

Task 6 : Laundry Services Responsive Issue

Problem Statement : Develop a responsive page for the laundry app we made in task 4.

Problem Description : We made the Hero Section of the laundry web app in Task 4 . But that works fine only on desktop when opened on mobile or tablet it breaks the layout we need to fix that using media Queries

Tasks :

- **Navbar:**
 - Text size for lists and logo and username gets smaller in tablet view
 - Hide the links in the mobile view just show the logo and username in the navbar.
 - Instead of display : inline use Flex.
- **Hero Section:**
 - Reduce the text sizes and image sizes in the tablet version..
 - Change the alignment and placing of image and text as shown in the sample output.
 - Hint :- Try using flex direction column

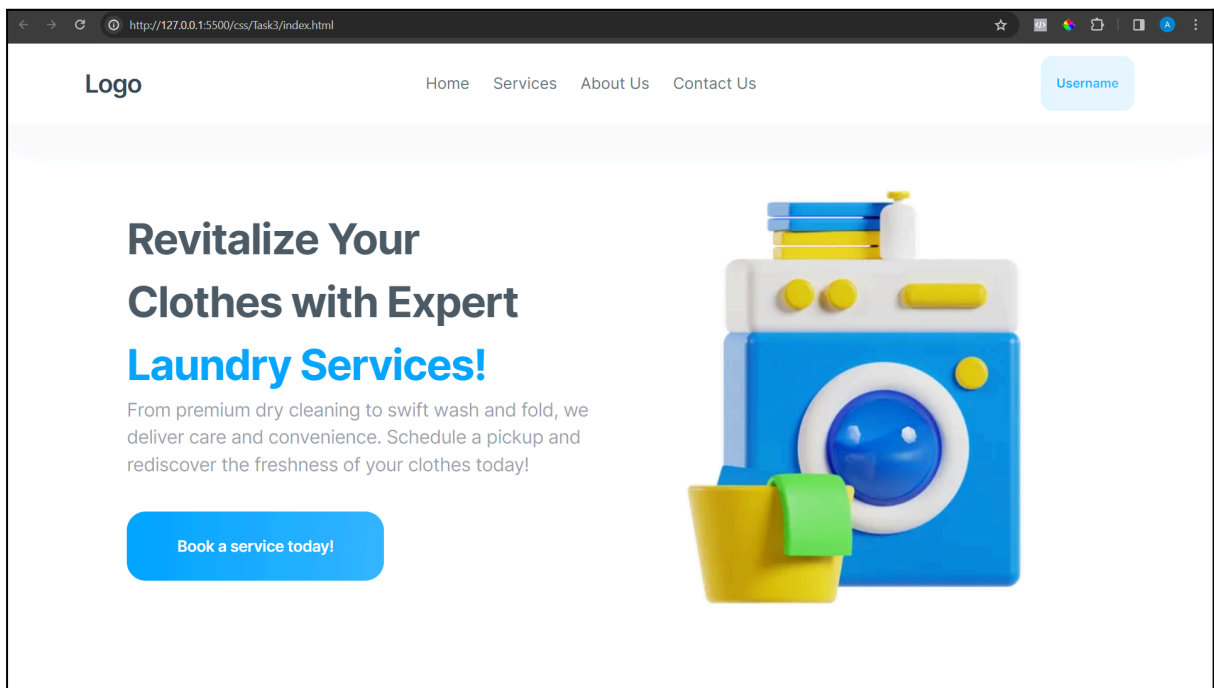

Submission Guidelines :-

- Deploy your code to netlify make sure to name your html file as index.html.
- If you don't know how to deploy on netlify, watch this video : https://youtu.be/li2Y4i4_i-o
- Submit the Deployed Link below in the same task number
- Submission link :- <https://upskillmafia.com/mern/dashboard/tasks>

Note : You can take help from **Internet** or You can also connect with upskill Mafia **Mentors**

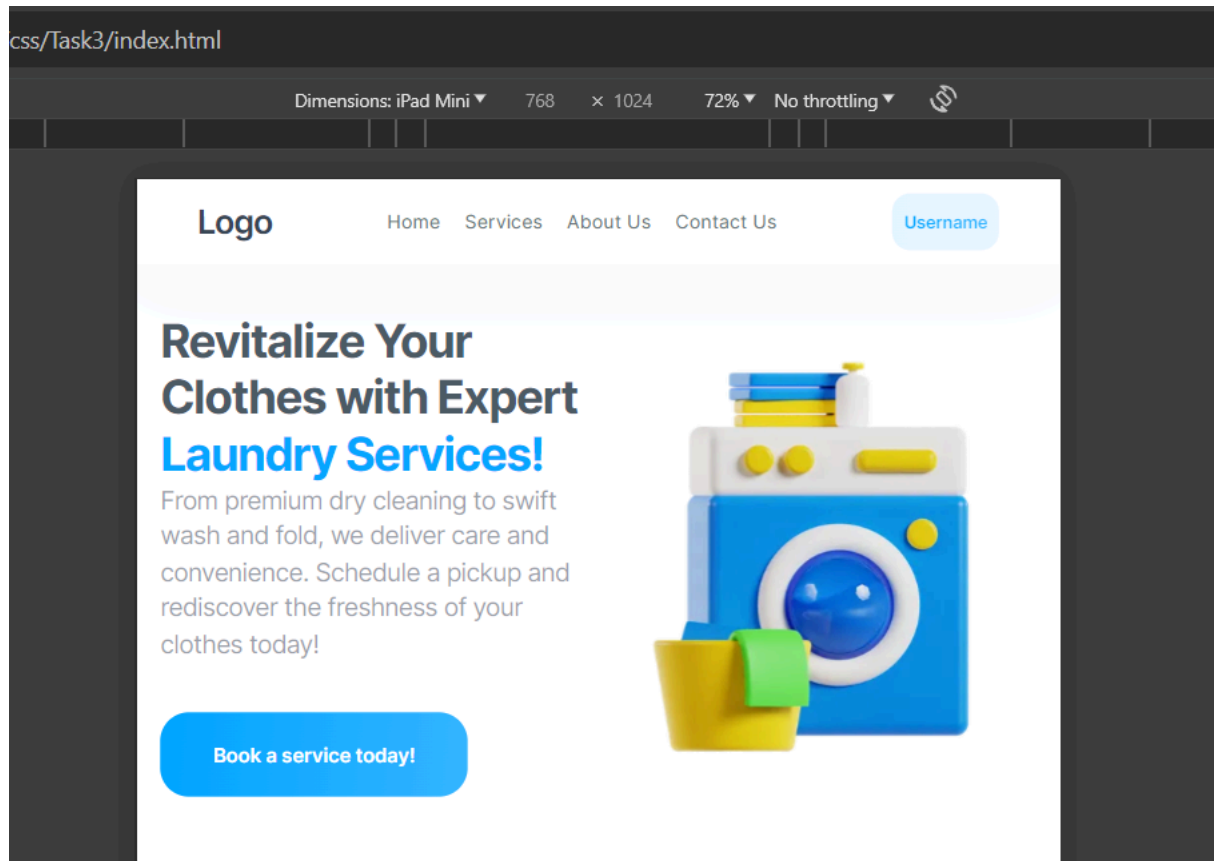

Sample Outputs:-

Desktop:-

Tablet :-

Upskill Mafia

Mobile:-
